

Delivering Concrete Solutions

About Hycrete, Inc.

Hycrete, Inc. leads the construction industry in solving the biggest challenges of concrete, the world's most widely used building material.

Hycrete's approach has led to a better way of designing and constructing buildings. First, Hycrete offers a way to put waterproofing **IN** concrete, instead of the traditional method of putting waterproofing **ON** concrete. Hycrete's combination of best-in-class products and world-class design and field service offer concrete waterproofing solutions that provide better quality, lower cost, and accelerate construction schedules - all without traditional exterior membranes. Second, Hycrete makes structures more durable. Hycrete's potent corrosion protection lines extend structure life substantially and eliminate maintenance and replacement costs, protecting the environment and improving public safety. Finally, all of Hycrete's products are Cradle to Cradle™ certified, furnishing value with a greener solution.

Based in Carlstadt, N.J., Hycrete's solutions apply to a broad spectrum of buildings and infrastructure projects. Hycrete is backed by the most prominent investors in the clean technology industry, including Mohr-Davidow Ventures, NGEN Partners, and Rockport Capital.
